

This map contains route segments for the Brookings County-Hampton 345kV transmission line project and represents the route applied for in a Facility Permit application in November 2010 with the South Dakota Public Utilities Commission. Areas outside of these routes should not be considered exempt from further analysis. Please continue to be involved with this important project.

This map contains the shaded area that represents the permitted corridor generally 600-1,000 feet wide (larger in some areas) as approved by the Minnesota Public Utilities Commission in July 2010.
